

# Strangle strangles

before it spreads

## Introducing *Equilis StrepE* – The UK's first strangles vaccine

No matter how well run a stable or yard, there's always a danger strangles will find a way in. And once it does, this highly infectious disease often spreads fast. As the first EU authorised vaccine against strangles, you can now have your horses vaccinated with *Equilis StrepE*. To take hold of strangles once and for all, speak to your vet or call Intervet on 01908 685685 today or visit [www.intervet.co.uk](http://www.intervet.co.uk)

*Equilis StrepE* is a vaccine for submucosal administration containing a modified live strain of *Streptococcus equi*. Legal category POM. © Registered trademark. Further information available on request. Intervet UK Ltd, Walton Manor, Walton, Milton Keynes MK7 7AJ
